

PRESS RELEASE

September 25, 2006

Intelli-Services, Inc. Approved as Vendor for GSA Business

San Ramon, CA – Intelli-Services, Inc. (ISI), a San Ramon based Electronic Document Management (EDM) Solutions Company was recently approved as a vendor for General Services Administration (GSA) Contracts. ISI's application was more difficult to process than most due to the unique services ISI offers. EDM is a new category for GSA and therefore ISI became one of the first on the list.

GSA is an enormous market with endless needs for "Business Automation Solutions". Obtaining this contract opens the door for Intelli-Services to participate as a government qualified vendor in both Federal and State opportunities. (i.e. Home Land Security, The National Guard, Social Security Administration, Internal Revenue Services, any and all Federal and/or State offices)

Being awarded a GSA Contract also gives ISI an enormous amount of creditability due to the rigorous diligence required to obtain approval.

ISI is in the process of building a sales department exclusively to support GSA EDM opportunities. Recently, ISI retained Joanne Sarmiento to prepare and manage GSA Request for Proposals (RFP's). September 2006, ISI submitted its first GSA proposal.

ISI's primary goal in obtaining this contract is to become GSA's preferred source for EDM services. GSA approval is the first step.
